Sept 2015 - May 2022

- Worked in multiple positions at different companies McDonalds Team Lead, Denny's Cook, Best Buy Associate, Kelowna Farmers Market Event Organizer.
- On team of sizes 2 - 40, held leadership roles, trained staff and organized events

Personal Projects

Group Project Blog Website

- As part of a group project, I used the Agile Scrum method and Jira to assign tasks.
- Created a website with HTML, CSS, JavaScript, PHP and Ajax for online discussions and personalized blog posts. The website features included user sign up, secure login, searchable posts with tags.

League Of Legends Game Analysis

- Worked with the “League of Legends” public API to retrieve information from thousands of games with the goal of finding strategies used by skilled players to win games.
- Grouped data based on win rate, and tried to find correlations in different metrics and those win rates.
- Data was cleaned with Pandas to remove irrelevant information or data that was out of scope.
- Created visual summaries and presented with Tableau to make an informative presentation.
- Collected input from different stakeholders to demonstrate improved process and results.

Professional Website “NakNak.ca”

- Created a personal website to display my projects and resume.
