

Nakheem Duhaney

Front-end developer with experience building Angular applications at scale for 500 retail stores. Skilled in TypeScript, React, and API integration, with an interest in interactive and 3D web experiences

Nakheem.duhaney@hotmail.com - NakNak.ca - linkedin.com/in/nakheem

Programming Languages: Angular, Python, CSS, JavaScript, SQL, React Js, HTML, Bootstrap, VBA Excel Macros, TypeScript

Frontend: Angular, React, HTML, CSS, RXJS, SCSS

Backend : Node JS, Java Spring, REST API's

Tools and Support: Git, Docker, Jenkins, Jira, Confluence, SonarLint

Bachelor of Arts in Computer Science(minor in Psychology)

June 2023

University of British Columbia, Department of Science and Arts

Work Experience

Front-End Developer / Internal Tools Engineer, Canadian Tire Corporation

Nov 2023 - Current

- Develop and maintain internal web applications using Angular for over 500+ stores, providing real-time access to sales, margins, and top-performing products.
- Owned full application lifecycle: requirements gathering, development, testing, and user support
- Achieved 100% store adoption within one month, with 40+ stores using daily
- Creating Jira documentation creating user stories and acceptance criteria and creating automated test with Jasmine
- Built and integrated RESTful APIs with Java Spring in collaboration with backend teams
- Supported the migration of legacy Excel tools to scalable web applications, improving usability and data reliability
- Build Excel tools with VBA to support legacy product ordering, inventory updates, and sales analysis for stores
- Developed Python automation scripts using SQL to analyze stockouts and identify replenishment opportunities

Supply Chain Process Analyst, CO OP Student, Canadian Tire Corporation

Sept 2022 - Sept 2023

- Audited supplier shipping data, using EDW Databases and SPS EDI systems to identify discrepancies.
- Created a Python script to automate error detection that flagged over 500 errors in Excel-based audits on its first run.
- Communicated with internal teams and external vendors to resolve shipping disputes. Acting as mediator between stakeholders.

Web Developer CO OP, University of British Columbia

May 2021 - Sep 2021

- Added scoring system and leaderboard to existing coding practice platform for UBC students
- Used Django backend to support RESTful api request from the frontend and manage data in sql lite database
- Wrote JUnit tests to validate student code submissions, accounting for multiple solutions against multiple correct solutions.

Student Art Intern, Lake Country Art Gallery

Oct 2021 - May 2022

- Updated website content, organized and hosted events, and supported administrative operations.

Personal Projects

- Hosted on personal website NakNak.ca
- Competing in Coding Game Jams, links available upon request
